

Absolute tragedy: 930 people have died in nursing homes in Spain after being vaccinated and 2,747 infected

For **The right-handed** - February 26, 2021

Extraordinary and at the same time tragic and terrifying the report prepared by the website of the 'Political Victims Association' in which the incidence of vaccinations in nursing homes is detailed until last February 20, that is, now they can be more.

According to the information that can be accessed directly through this [link](#), there are already 930 people who died in nursing homes after receiving the first or second dose of vaccination and 2,747 people infected.

The numbers are absolutely terrible, but the most terrible thing is that, despite those numbers, the judges continue to force the elderly to be vaccinated, despite the opposition of their families. A whole generation is leaving us, the generation that raised this country from nothing, the generation of war and post-war, the one that was born in times of hunger and misery, the one that has given everything for Spain and its children.

And we, your children and your grandchildren, are doing absolutely nothing to protect them. Shame on us.
