

Stop of the Federalization of the EU!

Charles Michel

President of the European Council

Heads of State and Government of the European Union countries

Ladies and Gentlemen,

The European Union was established as a community of sovereign nations that wish to achieve peace on the continent and ensure the free movement of people and goods to build a prosperous Europe in peaceful cooperation. The key premise of this cooperation, that is, the respect for the sovereignty of the community's member states, is currently being undermined by the recent attempt at revision of the EU treaties proposed in the European Parliament resolution of November 2023.

If implemented, the amendments drafted by five MEPs from Belgium and Germany will abolish the sovereignty of nation-states and will establish a European superstate.

The draft provides for 267 amendments to the EU treaties, which eliminate the right of veto in 10 areas fundamental to the independence, sovereignty and self-determination of nations, including border protection, foreign policy, security and national defense, cross border infrastructure, manufacturing, health policy, monetary policy, environmental protection, family law and education.

The proposed reform constitutes a *de facto* liquidation of the European Union based on a community of free, independent, sovereign nations cooperating according to the principles of unanimity and consensus. It will be replaced by a highly centralized European superstate encompassing provinces – former nation states, whose domestic and foreign policies shall be determined outside of their borders and without regard for the will of their people.

The draft was approved by the European Parliament in November 2023, thus starting the procedure of the European Treaty change, which shall require the approval of all EU states. The decision on further actions rests in your hands now.

Therefore, we demand that you respect and protect the sovereignty of EU member states and reject the changes to the EU Treaties proposed by the European Parliament.

There will be no unification of Europe without respect for the sovereignty of nation states!
